

Interactive learning that explains, checks, and corrects itself — built for schools, programs, and families.

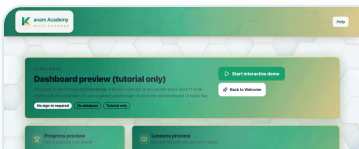

Four structured 8-week pathways. Real Python & SQL in the browser. XP, badges, and capstone projects — with standards-aligned documentation for reviewers.

THE CHALLENGE

Students need credible pathways into **coding, AI, data, and digital citizenship** — not unstructured screen time. Schools need programs that are **measurable and manageable** without a dedicated CS teacher.

THE ANSWER

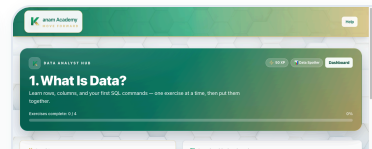

Kanam Academy delivers 59 interactive lessons across four tracks. Learners run real code, get instant feedback, and progress on a visible roadmap — **no software to install**.

Track dashboard & XP

Python + AI exercises

SQL & data viz

Four programs · one platform

AI Literacy

16 lessons · 8 weeks

Prompt responsibly, verify outputs, navigate bias, privacy & academic integrity.

Digital Literacy

16 lessons · 8 weeks

Search critically, communicate online, protect privacy, create ethically, career-ready skills.

AI + Python Starter Pack

13 lessons · 8 weeks

Variables → logic → loops → functions → **Build Your AI NPC** capstone.

Data Analyst Track

14 lessons · 8 weeks

SQL queries, summaries, charts (bar, pie, line, histogram, scatter) → **data project**.

How every lesson works

1

Learn it

Short lesson module, plain language

2

Do it

4 auto-graded exercises

3

Reflect

Ethics + check-for-understanding

4

Earn

XP, badges & progress

Why schools & partners choose Kanam

- ✓ **Standards-aligned** — CSTA (L2/L3A), K–12 CS Framework, ISTE, Common Core Math
- ✓ **Evidence of mastery** — auto-graded code/SQL, capstones, progress reporting
- ✓ **Flexible delivery** — live cohort, hybrid, self-paced, homeschool
- ✓ **Low staff burden** — coach's notes, explainers, instructor dashboard
- ✓ **Pilot-ready** — demo mode for families & decision-makers

Built for every stakeholder

Parents · Administrators · Program buyers · Instructors

MOVE FORWARD

NEW STUDENT

I'm a new student

Enter your class code and email to get started.

Class code

e.g. KANAM-7B

Check your email for your class code.

RETURNING LEARNER

Sign in fast

Enter your email and jump right back to your dashboard.

Email

e.g. student@school.org

Use the same email you used before.

For parents

Visible progress, ethics woven into every coding lesson, no downloads, and a demo mode to preview before enrolling.

For administrators

8-week scope & sequence, accreditation documentation, per-student progress data, works on Chromebooks.

For program buyers

Four complementary tracks, flexible licensing, capstone outcomes, pilot-friendly onboarding.

Standards & frameworks

CSTA K–12 CS (2017 · L2 & L3A)

K–12 CS Framework

ISTE Standards for Students

Common Core Math · Statistics

CSTA Draft 3.0 (forward map)

Capstone outcomes students can show

AI + Python

Rule-based AI NPC that listens, decides, remembers & responds

Data Analyst

Full investigation: query → summarize → chart → conclusion

AI Literacy

Personal plan for using AI ethically at school & home

Digital Literacy

Personal digital toolkit: safety, skills & career readiness

Deployment at a glance

Audience

Grades 6–10 (ages 11–16) · written for grade 6 readability with 9–10 extensions

Pacing

~8 weeks per program · 2 sessions/week · self-paced or mentor-supported

Technology

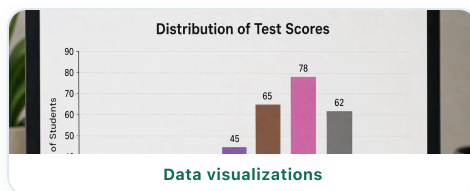

Cloud web app · browser-only · secure accounts · instructor dashboard

Delivery models

Live cohort · hybrid/flipped · after-school blocks · homeschool/co-op · site license

Licensing

Site license · per-class · per-seat · enrichment packages · PD add-on (optional)

Kanam Academy — Move forward.

Give students credible pathways into coding, AI, data, and digital citizenship — with programs schools can adopt and parents can trust.
